## Sports

Two ball games were played at the Carbon diamond Sunday. In the afternoon game the Carbon baseball team defeated the Grand Forks nine 33-7. The evening encounter saw the Legion softball team romp home to a 32-18 victory over the Lions.

Reid's Ranchers lost a close game at Swallow Friday evening, losing to the home team by a 10-6 score.

The Carbon baseball team lost a postponed league game to Ghost Pine at the latter's diamond Friday evening by a 9-4 score.

Daily Vacation Bible School classes commenced at the Carbon school Monday morning with an excellent enrolment of children of all ages. Rev. J.G. Rott is president of the Bible School, with Mr. Adam Buyer, assistant-president; Mrs. Ruby Mortimer, secretary and registrar, and Rev. J. W. Way, devotional flannelgraph story teller. Teachers and assistants are Miss Brown, A. C. T. I. student of Leduc, Miss Stella Schell, A.C.T.I. student at home on vacation, Mrs. J.G. Rott, Mrs. Art Weigum, Mrs. Ted Sherring, Mrs. Clarence Grose, Mrs. Ed Ohlhauser and Mrs. Andy Mortimer.

A five-foot cement wall was built around the town well in the park Monday. The cement was poured by Lions Club members under the supervision of Councilor J.J. Forsch. Monday evening the Lions laid a cement floor in the ladies' dressing room at the swimming pool and Tuesday evening completed the men's side. The Lions Club extends sincere thanks to the school boys and others who so ably assisted.

Miss Leona Ross, returned missionary from China, was guest speaker at the Baptist Women's Missionary Society meeting in the park last Thursday afternoon. Miss Ross, who has spent 33 years in the Chinese-mission field, 27 of which were among the river boat families, showed two reels of colored moving pictures of her work to the gathering. A business meeting and picnic lunch followed.

Const. and Mrs. Bill Pickerill were honored Wednesday last at a gathering of friends at the home of Mr. and Mrs. Norman Nash. The couple were recipients of a tri-light lamp. Friday evening Mrs. Pickerill was guest of honor at an I.O.D.E. pot luck supper in the park and was presented with a silver spoon. Mr. and Mrs. Pickerill have since left for their new home at Strathmore.

Mr. and Mrs. Ray Campbell and family left Monday to take up residence at Didsbury.

Mr. and Mrs. Ralph Parks and family of Calgary were Sunday visitors at the home of Mr. and Mrs. Dick Sherring.

Mr. T.J. King and Tom Jr. returned Tuesday from a two-week motor trip through Spokane, Seattle, Vancouver and Victoria.

### CARD OF THANKS

We wish to thank all our friends and neighbors for their kind expressions of sympathy and beautiful floral offerings during our recent sad bereavement.

Mr. and Mrs. FRANK PIERSON

Funeral services for Frank Douglas Pierson, 4½, who died in an accident Monday, July 17, were held from Carbon United Church Thursday, July 20. Rev. M. Galbraith officiated and Winter Bros. funeral home of Drumheller were in charge of arrangements. Pallbearers were Royal Hay, John Diede, Ross Dunlop and Ray Mancell. Interment was made in the Carbon cemetery.

It has been brought to our attention that the purebred Hereford calf which was grand champion at the Drumheller junior club sale in June and shown by Daun Buyer, had been purchased from the herd owned by Lindsay Hay and is one of several which have won prizes.

Mr. and Mrs. Axel Castella were honored by their friends in the Webb district Friday evening at a picnic near Grand Forks sports grounds. On behalf of those present, Eli Spry presented the couple with a silver sugar bowl, milk jug and tray. Mr. and Mrs. Castella leave shortly to take up residence at the coast.

Rev. Jacob G. Rott will conduct morning services at the Carbon Baptist Church and evening services at Zion Baptist Church on Sunday, May 30.

All students interested in taking swimming lessons are asked to meet at the pool Tuesday, August 1, at 2 p.m. Wm. Ritson-Bennett will instruct.

## Appetizing Recipes For Jams and Jellies

### Damson Preserves

Wash Damson plums well. Prick each plum in four places. Weigh the fruit and use an equal weight of sugar. Add from  $\frac{1}{2}$  to 1 cup of water for each pound of sugar, depending on degree of juiciness of plums. Combine sugar and water and bring to boiling point. Stir continually until sugar is dissolved. Add prepared fruit. Cook until fruit is tender and mixture clear. Stir with care, frequently. When done, pack the plums into hot sterilized jars. Boil the syrup further if needed to thicken. Pour thickened syrup over fruit in jars. Clean edges of jars, then seal at once. Cool. Store.

### Pineapple And Strawberry Preserve

1 large pineapple  
4 quarts strawberries  
Put the pineapple through food chopper, add strawberries not too ripe. To 1 cup of fruit, add 1 cup sugar, cook until thick.

### Ginger and Pear Jam

$\frac{1}{2}$  cup diced candied ginger  
4 cups prepared fruit  
7 $\frac{1}{2}$  cups sugar  
1 bottle Certo  
To prepare the fruit.—Dice about  $\frac{1}{4}$  pound candied ginger. Measure  $\frac{1}{2}$  cup into a very large saucepan. Peel and core about 3 pounds fully ripe pears. Chop very fine or grind. Measure 4 cups into saucepan with ginger.

To make the jam.—Add sugar to fruit in saucepan and mix well. Place over high heat, bring to a full rolling boil, and boil hard 1 minute, stirring constantly. Remove from heat and at once stir in bottled fruit pectin. Then stir and skim by turns for 5 minutes to cool slightly, to prevent floating fruit. Ladle quickly into glasses. Paraffin at once. Makes about 12 six-ounce glasses.

### Pineapple and Strawberry Jam

4 cups prepared fruit  
7 cups sugar  
 $\frac{1}{2}$  bottle Certo  
To prepare the fruit.—Pare 1 medium, fully ripe pineapple. Grind. Crush thoroughly about 1 quart fully ripe strawberries. Combine fruits. Measure 4 cups into a very large saucepan.

To make the jam.—Add sugar to fruit in saucepan and mix well. Place over high heat, bring to a full rolling boil, and boil hard 1 minute, stirring constantly. Remove from heat and at once stir in bottled fruit pectin. Then stir and skim by turns for 5 minutes to cool slightly, to prevent floating fruit. Ladle quickly into glasses. Paraffin at once. Makes about 10 six-ounce glasses.

### Grape Relish

4 $\frac{1}{2}$  cups prepared fruit  
7 $\frac{1}{2}$  cups sugar  
 $\frac{1}{2}$  cup vinegar  
 $\frac{1}{2}$  bottle Certo  
To prepare the fruit.—Slip skins from about 3 $\frac{1}{4}$  pounds fully ripe Concord or other loose-skinned grapes. Bring pulp to a boil and simmer, covered, 5 minutes. Sieve to remove seeds. Chop or grind skins

and add to pulp. Measure 4 $\frac{1}{2}$  cups fruit into a very large saucepan. Add  $\frac{1}{2}$  to 2 teaspoons each cloves and cinnamon, or any desired combination of spices.

To make the relish.—Add sugar and vinegar to fruit in saucepan and mix well. Place over high heat, bring to a full rolling boil, and boil hard 1 minute, stirring constantly. Remove from heat and at once stir in bottled fruit pectin. Then stir and skim by turns for 5 minutes to cool slightly, to prevent floating fruit. Ladle quickly into glasses. Paraffin at once. Makes about 12 six-ounce glasses.

### Sour Cherry Jelly

Three cups (1 $\frac{1}{2}$  pounds) juice  
4 cups (1 $\frac{1}{2}$  pounds) sugar  
1 box powdered fruit pectin  
Stem (do not pit) and crush about 2 $\frac{1}{2}$  pounds full ripe cherries. Add  $\frac{1}{2}$  cup water, bring to a boil, and simmer, covered, for 10 minutes. If a stronger cherry flavor is desired, add a few crushed cherry pits during simmering.

Place fruit in jelly cloth or bag and squeeze out juice. (If there is a slight shortage of juice, add small amount of water to pulp in jelly cloth and squeeze again.)

Measure sugar into dry dish and set aside until needed. Measure juice into 3 to 4 quart saucepan and place over hottest fire. Add powdered fruit pectin, mix well, and continue stirring until mixture comes to a hard boil. At once pour in sugar, stirring constantly. Continue stirring, bring to a full rolling boil, and boil hard  $\frac{1}{2}$  minute. Remove from fire, skim, pour quickly. Paraffin hot jelly at once.

### Grape and Thyme Jelly

Using bottled grape juice  
 $\frac{1}{2}$  cup thyme infusion  
3 $\frac{1}{2}$  cups (1 $\frac{1}{2}$  lbs.) sugar  
1 $\frac{1}{2}$  cups ( $\frac{3}{4}$  lb.) bottled grape juice  
 $\frac{1}{2}$  bottle Certo  
To prepare thyme infusion, pour  $\frac{1}{2}$  cup boiling water over 1 tablespoon thyme. Cover and let stand 15 minutes; strain.

Measure sugar, juice and thyme infusion into saucepan and mix. Bring to a boil over hottest fire and at once add Certo, stirring constantly. Then bring to a full rolling boil and boil hard  $\frac{1}{2}$  minute. Remove from fire, skim, pour quickly. Paraffin hot jelly at once. Makes about 5 glasses (6 fluid ounces each).

### Apple Jelly

5 cups juice  
3 $\frac{1}{2}$  cups sugar  
Use apples with a good flavor, cut in quarters and core (do not pare). Cook in enough water to cover them. When soft strain through a cotton bag. Cook with sugar until it jells, 10 to 12 minutes.

## FUNNY And OTHERWISE

Voice (on the telephone): "Is my husband in the club?"  
Club Waiter: "No madam, I'm afraid he isn't."

"How do you know? I didn't tell you my name."  
"Husbands are never here, madam — especially those who are wanted on the 'phone.'"

A man who was wearing a hearing aid got into a taxi whose driver displayed great interest in the gadget.

"Are those things any good?" he

### I Was Nearly Crazy With Fiery Itch—

Until I discovered Dr. D. D. Dennis' amazingly fast relief — D. D. Prescription. World popular, this pure, cooling, liquid medication speeds peace and comfort from cruel itching caused by eczema, pimples, rashes, athlete's foot and other itchy troubles. Trial bottle, 35¢ first application checks even the most intense itch or money back. Ask druggist for Dr. D. D. Prescription (ordinary or extra strength).

## For Delicate Operations

This is a specially-designed surgical knife which recently enabled two Montreal, Notre Dame Hospital doctors, Dr. Edouard Gagnon, surgeon, and Dr. Paul David, heart specialist, to perform three successful operations on patients suffering from mitral stenosis—valvular disease of the heart. It is used to widen narrow passages of the heart.

## SOME TIMELY ADVICE

### You'll Enjoy Vacation More If You Follow These Tips

Two people who have travelled widely both on this continent and abroad offer some timely advice on how to get the most in comfort and pleasure out of 1950 vacations.

Whether your plans embrace a European tour, a cross-country trip or merely a few days at some nearby resort, there are some very helpful hints in an American magazine article by Carol Lane and Gordon Gaskill. Both agree that travelers should carry only the bare necessities in wearing apparel and shouldn't be afraid to ask questions.

"Dress and act like a lady, and you'll be treated like one," advises Miss Lane who is women's travel director for an oil company. "Wear flashy clothes, too brief shorts, excessive makeup, and you're inviting trouble."

Moreover, she cautions, never check into a tourist camp where all car licenses are local, and avoid places where a dance hall predominates.

As for clothing, Miss Lane tells of a recent 11,000-mile motor trip she

asked. The passenger replied that he would be lost without it.

"Ah, well," said the driver with a sigh, "nearly all of us has something wrong. Take me, for instance. I can hardly see."

"A man bought a dog for five dollars, then sold him. How much did he lose?"

"What did he sell him for?"  
"Chewing the piano leg."

An actor, not so well-known as he thought he was, received an offer of a part in a new show. Being on tour at the time, he replied by telegram:

"Will accept double what you offer. Otherwise count me out."  
Next day he received a telegram which read:

"One, two, three, four, five, six, seven, eight, nine, OUT."

"I always believe in weighing my words before speaking," said Mrs. Hopkins.

"And you don't give short weight, either," replied her husband.

A young surgeon received a phone call from a colleague who invited him to make a fourth at bridge. "Going out, dear?" asked his wife, sympathetically.

"I'm afraid so," was the brave reply. "It's a very important case. There are three doctors there already."

"I was a fool when I married you," said Mrs. Brownleigh, angrily.

"Yes, darling, but I was in love and didn't notice it," replied her husband.

## Make Most Of Summer Vegetables

DURING the summer months, fresh vegetables are begging to be served and served often. Fresh, tender vegetables from the garden or market are packed full of sunshine and health-giving elements. Crisp greens will fill salad bowls with flavor and color. Raw or cooked, vegetables are at their best in summer.

### Spinach Cartwheel

Two lb. spinach, 1 medium onion, 8 medium potatoes, 2 tablespoons butter, 2 teaspoons salt,  $\frac{1}{4}$  teaspoon pepper,  $\frac{1}{4}$  cup milk, 1 can cream of celery soup,  $\frac{1}{4}$  teaspoon nutmeg,  $\frac{1}{4}$  lb. process cheese.

Cook spinach, with little water, just until tender. Drain and chop finely. Boil onion and potatoes together until tender, drain and mash with butter, salt, pepper and milk until fluffy. Heat celery soup, add nutmeg and the chopped spinach. Line a greased casserole with  $\frac{1}{4}$  of the mashed potatoes and fill the centre with the spinach mixture. Cut Cheese into narrow strips and arrange on top of the spinach, spoke-fashion. Line the inside rim of the casserole with the remaining mashed potatoes, fluffing them up with a fork. Place under the broiler until cheese is browned. Yield: six servings.

### Summer Supper

Eight whole small potatoes, 12 whole small carrots, 1 cup green beans, cut in 1-inch pieces, 6 green onions, chopped, 1 cup boiling water,  $\frac{1}{2}$  teaspoon salt, 1 $\frac{1}{2}$  cups thick cheese sauce, 1 tablespoon chopped parsley.

Cook the potatoes, carrots, beans and onions in the boiling, salted water until tender, about 25 minutes. Drain well. Add vegetables to cheese sauce, reheat and serve, sprinkled with chopped parsley. Yield: six servings.

### Cheese Sauce

Two tablespoons butter, 2 tablespoons flour,  $\frac{1}{2}$  teaspoon salt,  $\frac{1}{4}$  teaspoon paprika, few grains cayenne pepper,  $\frac{1}{2}$  teaspoon dry mustard, 1 cup milk,  $\frac{1}{4}$  cup grated cheese.

Melt butter in top of double boiler. Blend in flour and seasonings. Add milk slowly, stirring until blended. When sauce is smooth and thickened, add cheese and stir until cheese is melted. Yield: about 1 $\frac{1}{4}$  cups sauce.

Be content—but never satisfied.

# Jasper National Park, Alberta

---Majestic Scenery, Popularity Increasing Yearly  
---One of the Largest Parks in North America

Jasper National Park and the Athabasca Trail conjure up memories of early explorations in the Far West, since the region in which they are situated has a fascinating historical background. Early fur traders, explorers, missionaries, scientists, and many other pioneers traveled undaunted through the valleys and across the mountain fortresses that are now part of this national playground. In bygone days the fur brigades trekked over the famous Trail, the "Eastern Brigade" coming up the Athabasca River from Fort Edmonton and through the Athabasca Pass to a point where it was met by the "Western Brigade", from the Pacific Ocean. While much of the glory of the Athabasca Trail departed with the passing of the fur trader, the building of the railroad across that section of the Canadian Rockies once again revived interest in this magnificent scenic area.

Established in 1907, the park has an area of 4,200 square miles and is one of the largest national parks in North America. Within its boundaries lie many glaciers, including part of the vast Columbia Ice-field, more than 100 square miles in extent. From this immense ice-cap issue turbulent rivers which eventually find their way to three oceans.

Jasper National Park has become one of Canada's most popular outdoor playgrounds. Jasper's majestic scenery and recreational facilities attract thousands of new visitors annually. Many return year after year. Last year 84,538 holidaymakers entered the park—the greatest number on record. Among the more popular outdoor sports in this area of natural beauty are boating, swimming, fishing, golfing, trail riding, hiking, climbing, and skiing.

The waters of the park offer vigorous sport to ambitious paddlers. Voyaging down the Athabasca River, where few portages are encountered, is a thrilling experience. The placid waters of Lac Beauvert and Lakes Trefoil, Annette, Medicine, Maligne, and Edith have a special appeal to those who love the "song of the paddle".

Swimming in the many beautiful lakes of the Canadian Rockies, enjoying mild mountain air and sunshine, is an exhilarating and healthful sport, especially for the young and vigorous. Miette Hot Springs, 38 miles from Jasper townsite, have won considerable popularity. These are among the hottest mineral springs in the Canadian Rockies. Their therapeutic properties have become well known among those who seek health and relaxation in warm-water bathing. The bathing installations at Miette have now been augmented by a new heated outdoor swimming pool in Jasper townsite, equipped with modern dressing-room facilities.

One of the most delightful recreations in the park is sport fishing. A number of lakes within three miles of the Jasper townsite offer excellent angling. Rainbow, cutthroat, brown, and lake trout abound. Rapidly proving a major attraction for tourists is one of the largest fish hatcheries in Canada where as many as 200,000 fingerling trout may be seen in the long hatching and feeding troughs in the main building. The importance of this hatchery in re-stocking the lakes and streams in the Jasper area is now widely recognized.

Lying in a superb setting on the west shore of Lac Beauvert is the famous Jasper golf course, one of the most picturesque in North America. Mountains and lakes flank every green and fairway.

For some years Jasper National Park has been one of the principal outfitting points in the Canadian Rockies for trail-riding expeditions, which in recent years have become increasingly popular. Hundreds of miles of well-kept trails lead to glaciers, green valleys, colourful flower meadows, rushing torrents, and jade lakes reflecting cloud and sky.

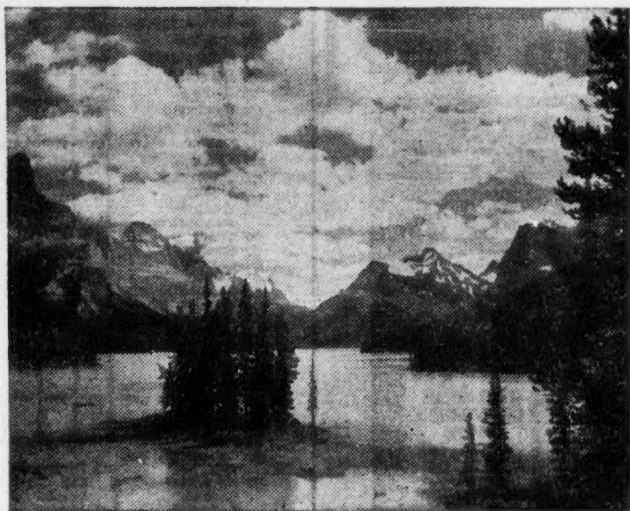

Headquarters of the park and the starting point for recreational activities is Jasper townsite, which derives its name from Jasper House, a trading post established about 1813 by the North West Company on the Athabasca River. A resident superintendent and his staff supervise the administration of the park. The Royal Canadian Mounted Police assist in the enforcement of law and order. Accommodation is provided by several hotels, by Jasper Park Lodge on the shores of Lac Beauvert, by a number of well-equipped bungalows and several cabin installations, chalets, and camp-grounds. Here visitors enjoy modern conveniences and at

the same time may admire an exquisite mountain picture framed in every window.

Motorists on the Banff-Jasper Highway can view much of the finest mountain scenery in the world, since the road is always in sight of towering ranges as it runs through the heart of the Canadian Rockies. From Jasper, the highway follows a great inter-mountain trench through the valleys of the Athabasca, Sunwapta, North Saskatchewan, Mistaya, and Bow Rivers, and visitors may drive within a few hundred feet of the snout of Athabasca Glacier. Eleven of the highest peaks in the Canadian Rockies are in the immediate vicinity of this ice-field. Opportunities along the highway to view native fauna, including many big game species indigenous to the Rocky Mountains, are excellent.

Today the tourist, seeking healthful recreation, relaxation and inspiration, travels right into the heart of Jasper Park in the comfort of an automobile or in a luxurious railway car. But for those who prefer thrilling adventure, away from the park highways, there are still many opportunities in this fascinating and far-flung alpine region. Trail riding, hiking, mountain climbing, and high-country skiing over the majestic changeless mountain terrain do much to satisfy the most ardent outdoor enthusiast. To the nature lover and the photographer the wildlife attractions of Jasper National Park provide special interest.

One of the first scenic gems to attract the attention of visitors to this region was the beautiful Maligne Valley depicted in the accompanying photograph. Maligne Lake is now accessible by a good highway and its popularity increases year by year.

Beautiful Maligne Lake, Jasper National Park

## Waterton Lakes National Park

---A Mecca For Thousands of Vacationists  
---Nature's Colourings and Carvings at Its Best

Long before the Waterton Lakes area was established as a national park it was a favorite place for spending a vacation. Before good roads made the area accessible to motor cars, visitors came on foot and by saddle horse to camp in these magnificent surroundings and to angle in its many lakes and streams. Waterton Lakes Park is a natural playground. This fact was recognized by the Government of Canada when, in 1895, the area was established as a national park. With the advantages of improved approach roads and the construction of the new park highways, Waterton Lakes became a Mecca for thousands of vacationists from other parts of Canada and from the United States. Last year 148,926 visitors entered the park, an increase of more than 62,000 over the previous year.

In 1932, as the result of legislation enacted by the Governments of Canada and the United States, Waterton Lakes and Glacier National Parks were proclaimed the Waterton-Glacier International Peace Park. Waterton Park is usually the first unit of Canada's National Parks system that is visited by our friends and neighbours to the south; its unspoiled natural beauty creates a keen desire to see more of these nationally-owned playgrounds in Canada.

Chief Mountain International Highway coming up from Glacier National Park in Montana is the most con-

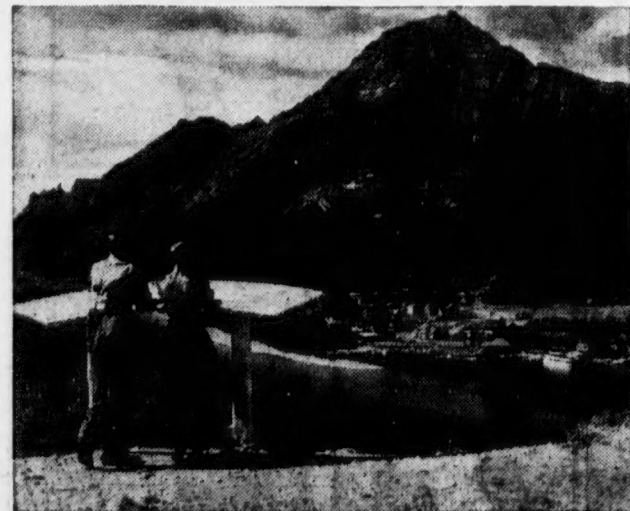

venient route to Waterton Park for American visitors. This fine scenic highway forms a link in a direct, hard-surfaced route to several of Canada's other national parks in the Canadian Rockies and Selkirk. Park highways connect Chief Mountain International Highway with Waterton Park townsite, Cameron Lake, and Red Rock Canyon.

Since the Waterton Lakes area became a national park it has been necessary for the National Parks

Service to provide recreational facilities as well as to make its scenic attractions more accessible to visitors. Camp-grounds, in choice location, equipped with kitchen shelters, stoves, tables, benches and in some cases electric light, have been provided for the convenience of those who still prefer to spend their vacation in the open. A townsite has been laid out on the shore of Waterton Lake and the necessary administration buildings erected. Public

Trails to some of the finest scenic areas in the park have been built by the National Parks Service, and there are always saddle horses available for those who wish to explore places of special fascination—charming lakes, enchanting waterfalls, and quiet, peaceful valleys—just as nature left them. There is a twice-daily bus service from Lethbridge to Waterton Park townsite—one by way of Cardston and the other by Macleod and Pincher Creek. The nearest railway is Pincher Station and Pincher Creek, for the convenience of those travelling by train. The Glacier Transport Company operates a frequent service from the south over the Chief Mountain International Highway.

Nature's colourings and carvings throughout this park area are so exquisite that no description, however vivid, could adequately portray the beauty and inspiring magnificence of the area. Some of the mountain peaks are formed of light-grey limestone; others are splashed and banded with red, green and yellow outcroppings. Some are rugged and massive while others are carved into shapes so fantastic as to suggest the towers and turrets of a fairyland castle. Nature's autograph, laboriously inscribed over thousands of

Waterton townsite from Viewpoint Waterton Lakes National Park Alberta, Canada.

### AN INTERESTING STORY—

## SAFE ON FIRST

"This Is The Clutch . . .  
My Chance, Last Chance,"  
Thought Johnny.

By SAMUEL CAMPBELL

JOHNNY WALTERS stepped back a piece from home plate, rubbed a little dirt on his hands, and returned to the batter's box. It was a tense moment in the tie game with two strikes, three balls, two men out in the last of the ninth. He was oblivious to the roaring crowd packing the stadium but what "Star" Winters, the team manager, had said kept beating loudly in his mind.

This was the pitch which would decide whether he could keep up the payments on his new home, and most of all, give Cathie, his wife, the operation.

The Senator's pitcher, Buzz Meagan, standing motionless on the mound, calmly rubbed a little resin on his hand as he gazed at the catcher waiting for the signal. Then he nodded, touched his cap, and began his long, slow wind-up.

Buzz was one of the best hurlers in the league. He had the lowest-earned run average mainly because of his blinding fast ball which he occasionally varied with a wide-breaking curve. He was a pitcher to be feared, especially in the clutch.

"And this is the clutch," thought Johnny, "my chance, my last chance . . ." He steeled himself against the million thoughts that teemed through his head. He resented those biting words of Star Winters, who had loved and lost Cathie, and who had tried to break his spirit in a thousand little ways since he took over the club. But this last time was the worst.

"You're finished, all washed up if you don't come through," he had whispered, just as Johnny stepped up to the plate.

The pitcher stopped his wind-up, stepped out of the box, and tossed the ball to the umpire who looked it over and found a cut in it; he produced a new ball and threw it into the game.

"That was just to give me the jitters," thought Johnny. It was an old trick but he knew it had almost worked. His nerves were raw and he felt the red flush of his face as perspiration trickled down his young but wrinkled brow.

"We've little money now, even for minor expenses," Johnny thought on, "but if we could win the series, the player pool to the winning team would be more than enough." A cold shiver ran down his spine. Every-

thing depended on him. It was like a dream. A second seemed an eternity. His future depended on this pitch.

First there was the little bungalow that he and Cathie had skimmed and saved to put a down payment on. How they would work together to improve it. Cathie would have the garden and rose bushes she always wanted and he would have his home work-shop.

Then there were those words, spoken in the honest but firm and imperative way that only Dr. Andrews could speak them: "An operation is absolutely necessary." Only a specialist could perform it, and Johnny knew that the expense was far too great for their limited income.

Suddenly he swung . . . the involuntary action of a well-trained athlete. The crack of the hickory against the ball resounded throughout the park. Johnny knew he had hit the ball and hit it hard as he streaked down the baseline.

The runner on second had started moving with the pitch and was now rounding third base on his way home with the winning run. Johnny's hard grounder was driven on a line across the centre of the diamond. It was a sure hit but for the speed of the second baseman who ran swiftly to his right, jumped high in the air, got part of his gloved hand on the ball but couldn't hold on to it. The short-stop, covering the play, moved in, reached, grabbed, and threw the ball almost in one motion towards first.

The base umpire stood tensed behind the first baseman who had one foot touching the bag, his gloved hand reaching out. Johnny thundered towards the sack.

The ball arched across the diamond, low and fast, almost in the dirt. Johnny could see he was beaten, but he plunged through the air a second before he heard the dull thud of the ball striking a glove.

"Safe on first!" shouted the umpire, motioning with his hands.

Johnny heard the words, then saw the ball rolling slowly towards the first base stands. He knew now his dreams would all come true . . . the new house, Cathie's operation, and after that . . . maybe a little rookie—Johnny Walters, Junior.

(Copyright Wheeler Newspaper Syndicate)

services including water, sewage, light, heat and power have been made available in this growing townsite. Recreation facilities such as a golf course, tennis courts, children's playground, athletic field, and dressing room facilities have also been provided in the Park. A fish hatchery supplies lakes and streams with sport fish for the enjoyment of the angler, and is also a source of interest to other park visitors.

Warden cabins have been built at strategic locations and linked with park headquarters by telephone. Private enterprise has built hotels and bungalow cabins for the accommodation of visitors, both in the townsite and at other beauty spots in the area. A resident superintendent, assisted by a park warden service, carries out park administration, including the protection of the forests and wildlife. The Royal Canadian Mounted Police assist in the maintenance of law and order.

Trails to some of the finest scenic areas in the park have been built by the National Parks Service, and there are always saddle horses available for those who wish to explore places of special fascination—charming lakes, enchanting waterfalls, and quiet, peaceful valleys—just as nature left them. There is a twice-daily bus service from Lethbridge to Waterton Park townsite—one by way of Cardston and the other by Macleod and Pincher Creek. The nearest railway is Pincher Station and Pincher Creek, for the convenience of those travelling by train. The Glacier Transport Company operates a frequent service from the south over the Chief Mountain International Highway.

Nature's colourings and carvings throughout this park area are so exquisite that no description, however vivid, could adequately portray the beauty and inspiring magnificence of the area. Some of the mountain peaks are formed of light-grey limestone; others are splashed and banded with red, green and yellow outcroppings. Some are rugged and massive while others are carved into shapes so fantastic as to suggest the towers and turrets of a fairyland castle. Nature's autograph, laboriously inscribed over thousands of

years and in thousands of different designs, is visible everywhere. No man-made devices could ever improve upon this handiwork of the elements, and it is the responsibility of the National Parks Service to keep this area inviolate for the benefit and enjoyment of present and future generations.

Among the delightful attractions of Waterton Lakes Park is the interesting wildlife which finds sanctuary there. Herds of elk wander back and forth between Glacier and Waterton Lakes Parks disregarding the International Boundary and displaying a completely international attitude. In their freedom of movement across the border, these elk symbolize the goodwill that inspired the formation of the Waterton-Glacier International Peace Park. They move north in winter and go back to Glacier in the summer—a reversal of the usual migration trends. Other big game species include mule and white-tailed deer, grizzly and black bear, Rocky Mountain sheep, Rocky Mountain goat, elk, moose and cougar. Small animals include the hoary marmot, badger, porcupine, beaver, and several species of squirrel. Bird life is abundant.

The forest cover of the park is of special interest to the naturalist as, within this area, prairie flora and mountain flora meet. Perhaps this influenced Lieutenant Thomas Blakiston, who was in charge of a section of the Palliser Expedition that visited the region in 1858, in his decision to name the area "Waterton" in honour of Charles Waterton, English naturalist, ornithologist and traveller. Waterton Lakes Park has remained the dream of the naturalist, the bird lover, and the vacationist.

### Smile of the Week—

"Repeat the words the defendant used," said the lawyer.

"I'd rather not. They were not fit words to tell a gentleman."

"Then," said the attorney, "whisper them to the judge."

The weight of one inch of rain over one acre of ground is estimated at 226,512 pounds.

## Trip Along Alaska Highway Is One Of Scenic Grandeur

THERE is a tremendous appeal for the tourist in the romance and adventure of a trip along the famous Alaska Highway—into the land of the midnight sun, along the gold rush trail of '98, penetrating a vast wilderness untouched by the hand of man. Pushing back the last frontiers of the north, the highway traverses a wild and beautiful country of mountain, lake and forest. Unsettled, except for infrequent small outposts or the occasional mining project and highway construction camp, this territory is a paradise for the hunter, fisherman or cameraman.

Edmonton is the starting point of the trip, but the highway proper begins at Dawson Creek, terminal point of the Northern Alberta Railway, 475 miles from Edmonton. From Dawson Creek, the highway, a gravelled, all-weather road, runs 1,523 miles to Fairbanks, Alaska, 1,221 miles of which is in Canada and 302 miles in Alaska.

Permits to travel on the Alaska Highway are no longer required, but arrangements for accommodation should be made in advance.

Travel on the highway should not be attempted in the early spring or late fall, as ice conditions at these times makes the ferry crossing of some of the large rivers between Edmonton and Dawson Creek impossible. It should be noted that the maximum load permitted by the Smoky River ferry is 12 tons. The preferred season is from June to October. Due to difficulties that may be encountered on the long grades, roads in Alberta may be obtained from the Director, Provincial Publicity and Travel Bureau, Edmonton, Alberta.

Loading and clearance regulations are as follows:

- Unrestricted gross weight, 15 tons.
- Special multiple axle or trailer type maximum gross, 30 tons.
- Maximum axle load, 12 tons.
- Axle spacing, 14 feet.
- Maximum vertical clearance, 14 feet.

Camp-grounds, with adequate cooking facilities, have been prepared along the route for the use of travellers who are equipped for camping and who carry their own supplies. Roadside accommodation—hotels, stores, meals, gas, oil and repairs the use of heavy trailers with passenger cars is not recommended. Reports on the condition of approach are available along the entire route.

There is also a public telephone and telegraph service operated by the Northwest Communication System at certain stations along the route. The Northwest Communication System ties in with other Department of Transport facilities at aerodromes in the region. Bus service is maintained between Dawson Creek and Fairbanks for travellers without automobiles.

If you are heading for the Alaska Highway this year, you will have a wonderful trip if you carefully plan the journey beforehand. If you are not equipped for camping, make arrangements for accommodation in advance. Remember that the road was built through the wilderness as a

### KITCHEN MEDITATIONS For Two Sound Feet

By JANE DALE

We count our blessings day by day And find so much to make life sweet. Perhaps we oft forget to give A special thanks for two sound feet. We walk the road with hurried pace Untarred by an ache or pain, On pleasure bent or to our work, Then turn our footsteps home again. We do not have to watch the steps Of others who can jump or run, And vainly wish for perfect feet, Or painless days with tasks well done. We count our blessings day by day; Each little thing which makes life sweet. An extra word of thanks we give For work filled days and two sound feet!

### STRENGTH OF CONCRETE

Construction in ferro-concrete is based on the combination of two materials which co-operate in sustaining safely the loads and stresses to which the structure is exposed. Concrete is an artificial stone-like material of excellent durability and offering great resistance to crushing or compressive stress, but with relatively small tensile strength. Mild steel bars, on the other hand, have great tensile strength. Reinforced concrete, the combination of fine concrete with embedded steel bars, is therefore well adapted for building purposes.

military highway and do not expect luxury on the way. A good first aid kit and sufficient spare tires, tubes and car tools should be included in your equipment.

Beautiful scenes along the Alaska Highway

## Safety Pointers For Hunters

Too many hunters and fishermen are being drowned every autumn in accidents which could be avoided if simple safety precautions are taken, Red Cross officials say.

In a water safety bulletin issued at the opening of the hunting season, the society recommended these precautions:

1. Know how to swim before you use boats.
2. Wear outer garments and boots which can be easily taken off in water.
3. Don't overload your boat.
4. Carry a life preserver or cushion for each occupant.
5. On lakes and large expanses of water, keep close to shore.

### RECOMMENDED TREATMENT

One recommended local treatment in the case of acne consists of day and night applications of hot lather, twice in succession, followed by a cold rinse, and applications of resorcinol, an antiseptic substance, sulphur and alcohol, in a flesh-tinted, non-greasy base, once or twice a day.

An astronomer estimated it would take an express train about 200 years to reach the sun from the earth.

—Central Press Canadian.

**THEY LAUGH AT HIGH PRICE OF MEAT**—The high price of steak and medical services are no worry to the family of Mr. and Mrs. E. W. Jackson of Toronto. They don't eat meat and they have no family doctor. The parents, along with Graham, Ellen and Shirley, shown here, eat fruit, nuts and whole wheat flour and vegetables, have never been ill.

Almost 12,000,000 Germans are displaced persons.

### CARE WITH CAMP FIRES

Never build a camp fire against a tree or log, in leaf mold or in-rotten wood. Build all fires away from overhanging branches and on a dirt or rock foundation. Dig all rotten wood or leaf mold from the fire pit and scrape away all inflammable material within a radius of from three to five feet. Make sure that the fire cannot spread on or under the ground or up the moss or bark of a tree while you are in camp and that it is going to be easy to extinguish when you are ready to leave.

### Weekly Tip

#### CARDIGAN SWEATER

When you go on an automobile trip wearing a suit, if the weather is chilly, wear a cardigan sweater while you drive, and hang the suit jacket in the back of the car. You'll be comfortable while you drive, and your jacket will be fresh-looking when you stop.

# Gold Mine Uncovered In Backyard

★ ★ ★ ★

# World News In Pictures

★ ★ ★ ★

★ ★ ★ ★

# Young Latvian Silversmith and Woodworker

★ ★ ★ ★

—Central Press Canadian.

**FIND SECRET BACKYARD GOLD MINE** — Things are humming in the town of Wedderburn, Australia, about 150 miles from Melbourne, since Burt Smith uncovered a gold mine in the backyard of Mr. Dave Butterick, a retired farmer. But Butterick and his three sons-in-law guarded their secret well. For the past 18 months unknown to anyone but the family, about 10,000 pounds, approximately \$28,000, has been taken from the mine. Smith uncovered the secret when he pulled a golden nugget from a hole just outside the Butterick property. Photo shows the two sons-in-law working the mine as the women folk bring cups of tea to the men. The Buttericks bought the property about three years ago from a local bank.

**SILVERSMITH AND WOODWORKER**—Oskars Vendedzis, young Latvian silversmith and woodworker, is shown with a few pieces from the collection of his jewelry, currently being displayed in Montreal. In his national costume, with handwoven tie, Mr. Vendedzis holds in his hands one of the larger "marriage" brooches he has made. The size and number of these brooches attached to the bodice of a Latvian girl indicates the wealth of her father, and how large her marriage dowry is likely to be. The sun, moon and stars figure largely in these creations, as do the many legends and symbols from Latvian folklore.

**SWEDISH ROYAL CHILDREN GROWING UP** — Wearing her girl scout uniform, Princess Margaretha of Sweden, 15, poses with her younger sister, Princess Christina and brother, Prince Carl Gustaf, after the elder princess had taken part in a girl scout competition in Stockholm.

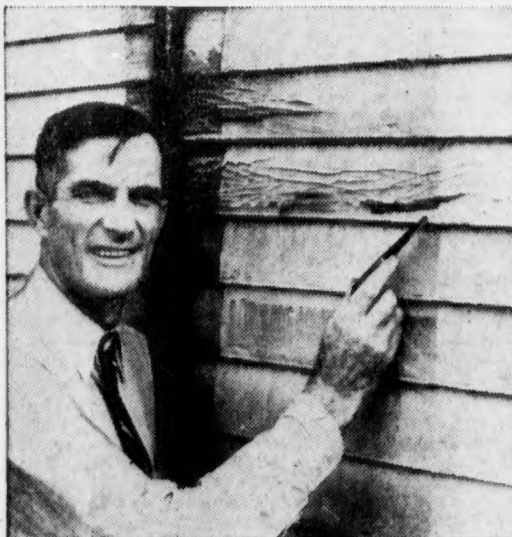

## Canadian Fashion

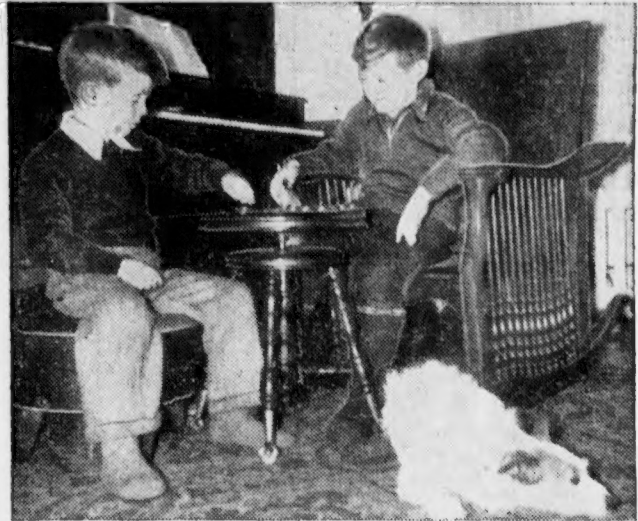

**FROST-WHITE** — Trimly tailored suit of cool white gabardine featuring double-breasted lounge jacket and straight skirt with centre pleats.

**COULDN'T KEEP HIS REPUTATION**—It looked like a golden opportunity to Sniffles, one of the prize winners at the New York Boys' club annual pet show. The kitten had just been given an award as the "Best Behaved Cat"—and then came temptation. A few feet away was a bowl, and in it were some goldfish. But it was the cat who finally was caught—not the fish.—Central Press Canadian.

**PLANNING TO PAINT?**—Shown above is a job overlooked by too many people before the paint is applied. Left: A common type of paint disintegration that must be handled carefully before the surface is repainted is cracking and flaking. Tiny cracks have cut all the way through the old paint coating, and edges have loosened and curled away from the surface. New paint cannot be applied successfully over a coating that has deteriorated to this extent; the old paint must first be removed by scraping or burning before the new is brushed on. Right: A good method of removing areas of badly worn paint is burning off the old coating with a blow-torch. Such equipment should be handled with care by an experienced person.

**"IT'S YOUR MOVE,"** says Angus MacKenzie, of Cape Breton, N.S., in stocking feet, to his smiling brother Donald, who appears to be winning the game of checkers. The dog doesn't seem to have much interest in the outcome.

**MOVE OVER, BONNIE** — Eight-months-old Bonnie Jean Howard of Portland, Maine, doesn't seem to mind a bit as her pet Boxer pup, Bruce, finishes up her breakfast cereal. Maybe Bonnie realizes Bruce is just a six-weeks-old baby and hungry all the time.

**FOUR FAST FRIENDS.** Back row, left to right: Juliette, Yvonne and Cecile Arsenault. Front row: Tippy. A full bottle saved his neck.

## Seven Factors Measure Temperament

WASHINGTON—Major differences in temperament can be pinned down to seven factors. And if a psychologist gives you 20 questions, he can tell whether you have one of these factors, impulsiveness, for example.

The seven measurable factors of temperament, and the 20 questions for each, were reported to the National Academy of Sciences here by Dr. L. L. Thurstone, University of Chicago psychology professor of intelligence test fame.

Besides impulsiveness the other factors in temperament are: pressure for activity, masculinity, dominance, emotional stability, sociability, and reflectiveness.

The person with pressure for activity factor is always "on the go". He or she walks fast, talks fast, and drives fast.

Persons high in the masculinity factor like athletics, like to be out of doors, and like to work with tools.

Persons scoring high on the impulsiveness factor are of a happy-go-lucky, carefree, daredevil disposition. They act on the spur of the moment, make decisions quickly and like competition.

Those who just plug along steadily rank low on the impulsiveness factor.

High scores on the dominance factor go to persons who think of themselves as social leaders, capable of taking responsibility and initiative. They enjoy promoting a new project, like to preside at meetings and like to persuade others.

Persons with emotional stability have even dispositions and are characteristically cheerful.

"They can relax in a noisy room and they remain calm in a crisis," Prof. Thurstone says. "They claim they can study with a radio on."

Persons rating high in sociability are the kind strangers like to tell their troubles to. And they usually are tolerant of a great variety of foods.

People with high reflectiveness factor are usually quiet, like to work alone, enjoy work that requires accuracy and detail, often take on more than they can finish and would rather plan a job than finish it.

## YOU'RE TELLING ME

By WILLIAM RITT

Central Press Canadian Writer

It should be simple to bring about more rain. Just add more Sundays to the calendar.

With so many persons trying to find a cure for the common cold it's surprising we aren't all too busy to catch one.

Ontario has the prize dough boy. He's a 10-year-old who defeated a field of 10 girls in a cake-baking contest.

Television, it's announced, is now to go in for educational stuff for grammar and high school pupils. Junior's in for a big surprise if Hopalong Cassidy gallops up, looks him right in the eye and draws: "O.K., Buckaroo—how do you spell cat?"

On reading the above, Zadok Dumkopf says that sounds like a tougher bit of beef than they serve at the corner beanery.

To find out just how many relatives and friends you have, suggests the man at the next desk, just let the news eke out that you've rented a summer cottage for the full season.

Plaids and checks, we read, are popular with college students. Especially checks—from home.

There's a place for everything—and in the case of a dandelion it definitely isn't the front lawn.

A New York woman saved a box of candy, without eating any of it, for 63 years. Must have been on a life-long diet.

Australia, according to Factographs, has a stretch of railroad track that extends 328 miles without the slightest bend or curve. What does the engineer do—open 'er wide open and relax for, say, five hours?

The dumber a baby looks, says a British child psychologist, the better fed it is. Unfortunately, this does not apply to grown-ups.

RAILWAYS PRESENT ADDED ATTRACTIONS—Anxious to attract passengers, Canada's railways are concentrating on making them more comfortable, smoother-riding and safer. Diesel engines, better rail beds, privacy and added personal conveniences are among the added attractions listed by the rail companies. Here Louise Dolson tries out a new duplex-roomette, a private sleeping compartment with complete facilities.

(By Francis James)

Dear Miss James:

I have an old studio couch which is in excellent condition except for the upholstery. I want to use it in a small upstairs bedroom I am fixing over as a den and am seriously considering trying to slipcover it myself. Not being very handy with a needle, however, I'm a little afraid to start.

## Renting Trailers Becoming Popular

(By Anthony J. Despagni in New York Times)

A new idea in trailer vacationing, sparked by British trailer concerns, seems likely to introduce a large number of new devotees to touring in their own motorized caravans. The idea is rental or short-term sale of trailers to vacationers who are not sure they want to own one but would like to try.

The trailer campaign was opened at the recent British Automobile Show in New York City, where the few British trailers on display attracted considerable attention from visitors to the Grand Central Palace. A number of sales and rental transactions were completed, and the show has been followed by a steady stream of additional inquiries.

Trailer renters and salesmen point to several advantages for the American traveler touring Europe in a trailer. There is, first of all, the assurance of a fairly comfortable overnight stop without dependence on strict itineraries. Time tables, hotel reservations and packing and unpacking of luggage are all eliminated.

In price the British trailer compares favorably with units manufactured in this country. The overseas products range from about \$900 to \$3,000, with a large number available in the \$1,500 class.

American travelers who purchase trailers for their holiday in Great Britain may resell them for pounds to the manufacturer or agency. A similar deal may also be worked out with some British automobile manufacturers or dealers for the hauling vehicle.

For those who may prefer to rent a trailer the price range is from about \$25 to \$30 a week, depending upon size and appointments of the unit. A car for hire to pull the trailer costs the tourist from \$15 to \$25 a week, with all gasoline provided, plus 7 cents a mile. A driver's license is obtainable for a dollar.

In the United States comparatively few trailers are rented for vacation travel, according to the Trailer Coach Manufacturers Association. However, when they are rented the dealer usually permits the rental fee to be applied to the purchase price should the individual desire to keep possession.

It looks so complicated. I would appreciate any help you could give me.

Mrs. J. G.

Dear Mrs. J. G.:

Actually there's nothing very complicated about making a slipcover. With patience, care—and a sewing machine—there's no reason why a woman who isn't very handy with a needle shouldn't make a smooth professional looking job of it. I emphasize, though, that a sewing machine is necessary, since even the neatest, most even hand-stitching will not hold the seams properly.

The first all-important step is an accurate measurement of the couch in order to gauge the amount of material needed. Remove the mattress and measure the width, length and depth of the box spring. Then measure length, depth and width of the mattress. You will need enough material to cover both top and bottom of mattress.

Now with a ruler and a piece of chalk, mark your material according to measurements of couch—allowing one inch for the seams. Now, if you're covering the mattress first, pin the top section, wrong side out, to the mattress with the one inch seam extending beyond. After it has been pinned, draw chalk mark over pins. This will be the seam line when pins are removed. Follow this procedure with other sections of mattress cover. The corners of your mattress will probably be rounded, so you should notch around the corners of the cover for a close fit.

Follow this same procedure for covering the box spring.

Probably the most ticklish part of making a slipcover is the wetting of the mattress seams which is necessary for a smooth, well-tailored appearance. Bias strips of the couch fabric should be used for this. Stitch it to the section along the chalked line. Then pin the adjoining section to the piece with the wetted finish, also following the chalked line. Place the pins lengthwise and away from you and remove them as you reach them in stitching.

## ENGLISH TOWN JUDGES MAYOR BY HIS WEIGHT

At High Wycombe, England, they weigh the mayor after his first term of office. They have been doing it for 600 years. If the mayor puts on weight while in office, he stands convicted of laziness. In olden times, after such a discovery, the mayor was booted and jeered in public. This year, the mayor cleared himself of all suspicion that he was getting fat on the job. He actually showed loss of weight.

Pompey's theatre was the first stone-built theatre in Rome. It was erected about 52 B.C., and is said to have seated from 10,000 to 40,000 persons.

## If Only Women Were Inventors

(By Angela Best in London Daily Mirror)

How would you like a boomerang hat, so that if it blows off in the wind it's bound to return to you?

A whacky idea? But a much more useful invention than the atom bomb. Now, if only inventors were women all the little worries in a girl's day-to-day life—the splashed stockings and lost gloves—would be remedied.

Why can't men inventors be like Charles Rowley, the man who, 100 years ago, created the modern safety-pin.

The first thing they could remedy would be a woman's lapse of memory that makes her rush out of the house without a clean handkerchief, her lipstick, her gloves or her keys.

What about an invisible ray a few feet inside the front door? When you step into it a gramophone record is set in motion which chants at you: "Remembered your handkerchief, keys, lipstick, etc.?"

Splashed stockings can spoil the whole day for a woman who wants to look smart.

Can't somebody discover a chemical that beats off drops of mud or dissolves them into nothing as soon as they touch the stocking?

There's plenty of scope for a man who's interested in buttons.

There must be some remedy—maybe in the field of magnetism—for buttons that drop off, come undone or break in pieces.

And what about the things you're always leaving in the bus—gloves, parcels, umbrellas, handbags?

I suggest some kind of talking device so that, as soon as immediate contact with their owner is broken, they shout out, "Don't forget me..."

There must be a lot of money waiting for someone who can discover how to keep a girl's skirt from blowing up round her waist in a breeze. Why should the law of gravity stop at apples and aeroplanes? Or how about a magnetic hem that just can't budge more than fifteen inches from the ground?

And I'm still waiting for something to keep the dirt and dust off our clothes without the arm-breaking contortions of brushing them while they're being worn.

What about a neat little vacuum cleaner that will fit into the handbag and, of course, works without having to be plugged in anywhere?

Also I'd welcome any invention that will ensure me a brand new face for the many days I feel fed up with this same old one.

But that's advanced stuff. I'll settle for the can't-peep-petticoat first.

## TOO NEW FOR HIM

HELENA, Ark.—A Helena motorist parked his car in front of a parking meter and left a nickel in a tobacco sack tied to it with this note: "Here is my nickel for the parking place. I do not know how to work this hear contraphsun. Will be back before my time is up."

Prejudice is the reason of fools.

## Truth About Road Accidents

Speaking of two leaflets issued by the Department of Highways dealing with the necessity of safe-driving, and mentioning the appalling statistics of the fatalities and injuries caused by road accidents, a writer in the United Church Observer says: The interesting thing about both these leaflets is not what they say, but what they leave unsaid. Certainly it is true that "concentration on the job of driving" and "proper control of the vehicle under all conditions" would eliminate the majority of highway accidents.

But why not call a spade a spade and tell the public the truth about highway accidents in the Province of Ontario and put the blame on the one person, more than any other, who is responsible—the drinking driver!

Both the Ontario Department of Highways and the Insurance Underwriters know perfectly well that drinking is the direct cause of the majority of accidents of all kinds in the province today. If the Ontario Department of Highways and the Insurance Companies really want to make today's traffic safer for all, then let them plaster across the face of the province the plain words: If You Drink, Don't Drive! If You Drive, Don't Drink! A few years ago this slogan did make its public appearance, but the hush-hushers apparently persuaded the authorities to put it away in the cupboard, and now the slogan is brought out only at Christmas and New Year's, and then rather apologetically.

Vague generalities about "concentration on the job," "proper control of the vehicle, and courtesy at all times" are no substitute for a sharp command to "leave it alone!" The public needs to be more than generalized on this subject today.

—S.A. War Cry.

## TRY AND STOP ME!

By BENNETT CERF

A group of fishermen broke camp and began their long hike back to the nearest railroad station. En route they stopped at a lonely farm house and asked if they could buy lunch. "O.K.," said the old lady at the door, "if you'll be satisfied with pork chops." The hungry men fell to with a will, and when they had finished, complimented the old lady on the fine quality of the meat.

"I should hope it was," she agreed heartily. "That wasn't none of your butchered stuff. That hog died a natural death."

Have you heard about the two stamp and coin collectors who got together to talk about old dimes? Arthur Duffy saw a couple of termites gnawing at the woodwork in his cellar and swears one chortled, "Oh boy, this'll bring the house down."

## On The Side

—By— E. V. Durling

### THE POWER OF RED

I have heard that when a woman is feeling blue wearing a red hat will cheer her up. I have also heard that a red evening gown has considerable power in the way of male attraction. Mrs. Simpson was wearing one when she first caught the eye of the present Duke of Windsor. However, I never heard before that wearing a red dress increases a woman's brain power. But that's what Dr. Schweisheimer, color psychology expert, claims. How about buying your secretary a few red dresses and checking on this claim?

### A LESSON FOR ARCHITECTS

Women who have lived in several different houses, even though these houses are the same size, will tell you one is much more difficult to do housekeeping in than another. Usually this is the architect's fault. Too many male architects overlook the idea of planning a house that will be easy for a home manager to handle. All male architects should take a course in housekeeping. After that they should do some housekeeping. Then they will be in a position to plan houses that will make housewives happy.

### MATRESS CURE

A correspondent suggests hotels allow persons weighing over 250 pounds to occupy rooms rent free providing they agree to sleep in the centre of the beds. By so doing the weighty guests would iron out the bumps that are always in the centre of the hotel mattresses. This brings to mind that last fall we bought some new mattresses of which we complained, saying they were too hard and bumpy. The seller of the mattresses sent a man to look over the situation. This man arrived at our house and immediately taking off his coat began to jump up and down on the nearest mattress. He said to me: "How much do you weigh?" I said: "One hundred and 94 pounds." Commented the mattress expert: "Swell! Will you start jumping up and down on that other mattress? That will iron out the bumps in practically no time at all." So I started jumping. Just then my wife came home and when she saw this other guy and myself jumping up and down on the mattresses she thought we were both inebriated.

### THE SPICE OF LIFE

In London two families lived in the same room. A chalk line denoted their territories. Everything went along nicely until each family purchased a radio and started tuning in on different programs. That situation broke up the happy home. . . . Subscriber says she knew a man named Nick Parloriano. Asked where he acquired such a quaint name, Nick said that when his folks came to the United States many years ago they translated their name into English. In their own language it meant "Parlor Piano". . . . A reader asks what is the record for feminine longevity. All I know is that the Countess of Desmond died in England in 1732 A.D. at the age of 140 as a result of climbing an apple tree and falling from the topmost branch.

## OUR COMPLETE SHORT STORY—

# Candy Box :: She Always Wanted To Be Stolen.

By MARK HAGER

WHEN I whistled Effie out to her yard fence and asked her to marry me, she said she would be glad to, and shut her eyes for me to kiss her, which I did, but when she came up for air, she was counting something on her fingers.

"It'll take no less than a hundred dollars for our honeymoon," she said, and I explained that I did not have a hundred dollars or a job, either, but that I could work odd jobs and save up a hundred dollars in no time.

"But I don't want to wait," Effie said. "There's Pa. Pa'll give me a hundred dollars, only we mustn't let him know what I want the money for. I don't think Pa'd like it. But I don't care, Oscar. I hope you have to steal me. I always have wanted to be stole from Pa..." She showed me the ladder I could set up to her window.

I said, "Okay, honey. I'll whistle again tomorrow night and you can tell me if he gives you the hundred dollars."

When I whistled Effie out to her yard fence the next night, she said: "Oh, Oscar! Pa said he ain't got it till after he sells his mule. Pa thinks he ought to have a hundred dollars for his mule."

Well, I told Effie that was all right, and after I kissed her, we discussed the mule market, and it didn't seem promising, and I told Effie I could find odd jobs enough to work out a hundred dollars in no time, and I set to work. It took me all of June and part of July. I picked two hundred gallons of sour cherries, put up nine haystacks and dug one well for the farmers in our neighborhood, and I almost had the hundred dollars, but when I whistled Effie out again, she was kind of impatient and mad and wanted to pout, and said it was taking me a mighty long time to raise a hundred dollars, and besides, why hadn't I been coming to see her?

I explained to Effie I only had one more well to dig and I would have it, and I kissed her again, and she got in a good humor, and then I discussed with Effie something that had been bothering me.

Effie wanted me to steal her, but the idea did not please me. Effie had a Pa half as big as an oat stack with arms as big and hairy as stumps in a bamboo patch; in fact, he was not just the type of man you would like to steal from on account of the possible hereafter in case you ever met him again. I hadn't yet ventured in the house.

I did not explain to Effie I thought it was better to ask her Pa could we marry, but in a round-about-way, I asked Effie what little things pleased her Pa. I wanted to get him in a good humor to ask him, and the only thing Effie could think of was that her Pa had been eating up the chocolate cherries I had bought for her and she left them on the table in the house.

Well, when I finished the last well, I had a little over a hundred dollars, and I stopped at the store and bought a box of chocolate cherries, only this box was to be for Effie's Pa, and I would get him in a good humor and sweetened, and ask him, and then when I whistled for Effie again, I could kiss her and tell her it was all over, and we could marry and light out on our honeymoon.

When I got in sight of her Pa's barn, I saw he had this mule he wanted to sell hitched to the sled, and he was hauling manure from the barn. I opened the candy box, and handed it out to him, and he didn't just take him a cherry; he took the box, and then got him a cherry, and said, "Thanks, Oscar," and motioned me to sit down with him on the sled, and when the chocolate began to melt in his mouth, he edged over close to me as if he wanted to get real chummy.

"Oscar," he said, "you know I have been impressed with the hard work you have been doing of late. Not many boys of this younger generation will do such drudgery as digging wells and raking hay in the hot sun, and also, I hear you have been saving every cent of your money."

I knew right there was the opening. I wanted to speak up there and tell Effie's Pa why I had done all this hard drudgery and saved my money, and that would prepare the way for me to pop the question and ask him would it be all right with him for me to marry his Effie. But I could not speak. My tongue just would not work.

"And Oscar," he said, "doing the kind of odd job drudgery that you do, you ought by all means to have you a mule. In fact, you are doing mule's work, so to speak, and being as it is you, I will sell you this mule for one hundred dollars. And frankly, this hundred dollars will help me

out of a little tight squeeze for money just now."

I still did not speak, but what I saw next was Effie's Pa, and he was counting my ten ten-dollar bills, and he stuffed them in his overalls, and I was riding the mule bare-backed down the road, and wondering what I could ever tell Effie when I whistled for her that night, for I knew she would be madder than ever at me for not having this hundred dollars.

But she didn't seem mad at all when I whistled that night. She came bounding out to her fence, and in the light of the moon she began to count money. She counted ten ten-dollar bills.

"Oh, Oscar, honey," she said, "you don't have to finish that last well. Look here, Pa gave me this hundred dollars he got for his mule. Now we have practically two hundred between us, and we can get married and see Niagara Falls."

I said, "Honey, I finished that last well yesterday, but we ain't got two hundred dollars. What we got is your hundred dollars, my mule I bought from your Pa, and your Pa's ladder, and I intend to use the ladder and steal you away from him."

Effie slung both her arms around my neck.

"Good," she said, "I always did want to be stole," and she shut her eyes like she would for a kiss, and she got it.

## LADIES ARE BUSY IN TOWN OF CHURCHILL

The Ladies' Club in the northern Manitoba port town of Churchill is one of the busiest on record. In its two and one-half years of existence, it has paid \$4,000 to lower the debt for the school, now under construction; donated \$300 towards improving the teachers' living quarters in the building; put a public address system into the community hall and bought the singles to re-roof the hall. Along with numerous other welfare projects, the club members, numbering 20, found time to put out a booklet on Churchill. Five thousand copies have been sold and it was reviewed over the CBC.

## Snack Ideas

Here are a few other supper snack ideas picked up from hospital friends. You'll like them:

1. Cover buttered toast with hot applesauce and top with crisp bacon slices.
2. Mix deviled ham with scrambled eggs while they are still slightly moist. Continue cooking until the eggs are the way you like them.
3. Spread toast with butter or fortified margarine to which a little Worcestershire sauce has been added. Top with a grilled tomato slice and strips of bacon.

## WAKE UP YOUR LIVER BILE—

Without Calomel—And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out about 2 pints of bile into your digestive tract every day. If this bile is not flowing freely, your food may not digest. It may just decay in the digestive tract. Then gas builds up your stomach. You get constipated. You feel sour, sunk and the world looks punk.

It takes those mild, gentle Carter's Little Liver Pills to get these 2 pints of bile flowing freely to make you feel "up and up." Get a package today. Effective in making bile flow freely. Ask for Carter's Little Liver Pills, 35¢ at any drugstore.

## His Trees Have Grown

Yukio Ozaki, (centre), 91-year-old Japanese statesman, visits the famous cherry trees which he gave to Washington 38 years ago. Then he was mayor of Tokyo. Standing with him under the trees are his daughter, Mrs. Yukika Soma, and his son, Yuki-Teru Ozaki.

## DRIVE CAREFULLY AND COME BACK

Drive with reason this holiday season.

Don't let a bad accident spoil your holiday. When you are sightseeing keep your eyes on the road otherwise you are a hazard to yourself and others.

Too many drivers turn the wheel when they turn their heads to talk to someone or look at scenery. Stop your car if you want to admire the view.

## British Scientists Discover Tea Aids Juvenile Teeth

Scientists have discovered that tea is essential to the diet of British children because it supplies the fluorine needed to build healthy teeth, a columnist writes in The London Daily Mail. Experiments have shown that tea is the only item in the British diet that provides fluorine in the quantities adequate to give the teeth a tougher enamel and thus help them resist decay.

The fluorine has to be supplied during the first eight years of life to be effective in later life, as teeth cannot absorb the element after they are fully formed.

The low content of fluorine in British drinking water is said to be the chief cause of tooth decay, so much more widespread in Britain than in this country.

In one area of Britain where the fluorine content of water is adequate tests have shown that 12-year-old children suffer only half as much from toothache as children in a nearby area where the fluorine is inadequate.

## Words Applicable To Wild Life

Hunters, especially, will be interested in the words which apply to the young of wild animals.

Among the young of wild game birds, cygnet refers to the young of the swan; the young of the pheasant or quail is a chick; the young of ducks are ducklings and the young of geese are goslings.

Fawn is commonly used to refer to the young of the Red Deer, but it also applies to the young of the rabbit, caribou and antelope.

Corporations employ about two-thirds of all who work. 2890

## Where Are We Going To Stop?

THAT'S the paramount question whenever a tourist hits the road into unknown territory.

It's a question that need not unduly worry the traveller in Western Canada, for practically every hamlet and town boasts a hotel competent to offer good accommodation.

The cities and larger towns probably have more first class hotels than any other part in Canada. As the larger centres developed in this land of great distances it was necessary to provide greater than usual accommodation, but the same factor prevailed in the rural districts in the days when wheat hauling, often 30 or 40 miles, necessitated over-night halts.

Thus a system emerged which made the hotel the centre of community life, and this has in most places been perpetuated in modern life. Wherever you find a thriving district, there you'll find a good hotel.

As a rule today, railway stations are seven or eight miles apart and the tourist can find an approved hotel within his reach at almost any point. Many of these cater to tourists and can offer guides or other desired facilities.

Nearly every district provides some special tourist attraction, whether it be hunting, fishing, summer resorts or big game hunting. The tourist planning any specialized holiday would be well advised to communicate with the secretaries of the hotels association of the provinces, for complete information about his proposed trip, but the casual tourist need have no qualms about his visit. He will find accommodation to suit him anywhere.

Our hotels are tourist conscious. That imaginary line between Canada and the United States is nowhere more appreciated than between Western Canada and her adjoining American states. The people think much the same, have much the same interests, problems and advantages.

## GULL CHANGED FISHERMEN'S LUCK

Two fishermen fished all day in a gale and caught nothing, according to The London Daily Herald. They were just starting to pack their equipment when there was a "plop" on the woodwork behind them. A mackerel had been dropped by a gull. The anglers took the fish home for tea.

The highest mountain in the world situated on an island is Mauna Kea in the Hawaiian Islands, which has an altitude of 13,825 feet above sea level.

## Luscious HONEY BUN RING

Quick to make with the new Fast DRY Yeast

Hot goodies come puffin' from your oven in quick time with new Fleischmann's Fast DRY Yeast! No more spoiled cakes of yeast! No more last-minute trips—this new form of Fleischmann's Yeast keeps in your cupboard! Order a month's supply.

## HONEY-BUN RING

• Scald ¾ c. milk; ½ c. granulated sugar, 1½ tps. salt and ¼ c. shortening; cool to lukewarm. Meanwhile, measure into a large bowl ½ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 mins., THEN stir well.

Add cooled milk mixture and stir in 1 well-beaten egg and 1 tsp. grated lemon rind. Stir in 2 c. once-sifted bread flour; beat until smooth. Work in 2 c. (about) once-sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of

dough. Cover and set in warm place, free from draught. Let rise until doubled in bulk. Punch down dough and roll out into an oblong about 9" wide and 24" long; loosen dough. Combine ¼ c. lightly-packed brown sugar and ½ c. liquid honey; spread over dough and sprinkle with ¼ c. broken walnuts. Beginning at a long side, loosely roll up like a jelly roll. Lift carefully into a greased 8½" tube pan and join ends of dough to form a ring. Brush top with melted butter. Cover and let rise until doubled in bulk. Bake in moderately hot oven, 375°, 45-50 minutes. Brush top with honey and sprinkle with chopped walnuts.

Const. and Mrs. W. Pickerill and son, Donnie, left Saturday to take up residence at Strathmore, where Const. Pickerill will be in charge of the R. C. M. P. detachment. They were accompanied by

Mrs. Pickerill's mother, Mrs. MacDonald.

Miss Diane Gerlitz of Swallow is holidaying at the home of Mr. and Mrs. Jack Barnes.

Mr. and Mrs. Alec Sobysky returned Wednesday from a holiday spent at Lethbridge and Edmonton.

Mr. and Mrs. Jack Barr and son Dennis, returned Sunday from a holiday at Sylvan Lake. The relieving manager, Mr. Bill Hardy, is now at Alliance.

Mr. and Mrs. Fred Bessant returned Wednesday last from a holiday spent at Edmonton with Mr. and Mrs. C. Poxon.

Mr. and Mrs. B. Weigum and Mr. and Mrs. R. Quenzer of Marmora, S.D., spent several days last week visiting at the home of Mr. and Mrs. C. Dieder, and other relatives.

Rev. and Mrs. Warren and family returned Friday from a vacation at Island Lake, north of Edmonton, and will leave this week to take up residence at Taber.

#### Engagement Announcement

Mr. and Mrs. J.J. Ohlhauser of Calgary announce the engagement of their eldest daughter, Lorena, to Mr. Wilbert Kieler, son of Mr. and Mrs. W. Kieler of Vancouver, B.C. The marriage will take place September 2 at Vancouver.

#### UNWANTED HAIR

Eradicated from any part of the body with Saca-Pelo, a remarkable discovery of the age. Saca-Pelo contains no harmful ingredient, and will destroy the hair root.

LOR-BEER LABORATORIES  
679 Granville St., Vancouver, B.C.

WANTED—Milking Goat. Apply to Mrs. John Foray, Carbon.

## Former Carbon Boy Weds in Calgary

First Baptist Church, Calgary was the scene of a twilight wedding Saturday, July 1, when Barbara Evelyn, only daughter of Mrs. Martell and the late Mr. E. D. Martell, became the bride of Stanley Poffenroth, only son of Mr. and Mrs. Fred Poffenroth, all of Calgary. Dr. J. Gordon Jones officiated at the ceremony.

Given in marriage by her uncle, Mr. Mac Reid of Edmonton, the bride wore a gown of white satin and net, styled with lace trimmed peplum, sweetheart neckline and long lily-point sleeves. Her veil fell in folds to the floor from a headdress of split carnations and she carried a bouquet of calla lilies and sweetheart roses. Her only jewelry was a strand of pearls, gift of the groom.

Pastel-toned frocks in shades of yellow and turquoise respectively, were worn by Miss Shirley Price and Miss Elaine Poffenroth, sister of the groom. They carried sheaf bouquets of Ko-Ko-Mo carnations and sweetpeas.

The bridegroom was attended by his cousin, Mr. Don Pattison of Lacombe, and the guests were ushered to their places by Mr. Vernon Blitz and Mr. Robert Martell.

Miss Madge Thomas played the wedding music and Mr. Angus Anderson sang "The Lord's Prayer" and "I'll Walk Beside You."

Following the ceremony a reception for 118 guests was held in the banquet room of the Commodore cafe. Mothers of the bride and groom, gowned in pink and aqua with complementing picture hats, assisted in receiving, along with the bride's two grandmothers, Mrs. S. E. Martell and Mrs. M. Reid, both of Edmonton.

A three-tiered cake centred the table and the room was decorated with pink and white streamers, wedding bells, and bouquets of peonies and carnations. Rev. Dr. Jones proposed the toast to the bride.

The bridal couple left by motor for California, where they will spend their honeymoon. The bride donned a two-piece rose-colored suit with navy blue shortie coat and navy accessories. To complement her going away outfit she wore a corsage of red roses. Following the honeymoon Mr. and Mrs. Poffenroth will reside in Calgary.

Guests attending from Carbon and vicinity were Miss V. Pattison, Mr. C. Pattison, Miss Marilyn Hay, Mr. and Mrs. Dick Gimbel, Mr. and Mrs. Joe Holwegner, Mr. and Mrs. Frank Grainger, all of Carbon; Mr. and Mrs. C. Gordon, Vernon Blitz, Mr. A. Jacobs, all of Grainger; Leslie Mancell of Acme; Mr. and Mrs. F. Moore of Bircham; Mr. and Mrs. E. Poffenroth, Miss Delphine Poffenroth, of Swallow. Other out-of-town guests were Mrs. S. E. Martell, Mrs. M. Reid, Mr. and Mrs. A. Bevan, Mr. and Mrs. W. A. Reid, Mr. and Mrs. Mac Reid, Mr. and Mrs. K. Whalen, Mrs. A. Hays and daughter, Adele, and Mrs. H. T. Sykes, all of Edmonton; Mr. Don Pattison of Lacombe; Mr. and Mrs. W. Poffenroth, Mr. and Mrs. A. Poffenroth, of DeWinton; Mr. and Mrs. F. Elhardt, Mr. and Mrs. H. Heir, of Crossfield.

## CARS BY THEMSELVES ... ARE NOT KILLERS

The modern automobile, given reasonable attention and care, is mechanically safe. But you can't always trust the man or woman at the wheel.

Most of the traffic accidents this season — by a wide margin — will be due to HUMAN FAILURE . . . not anything going wrong with the car itself. Drivers will fall asleep. They will pass on hills and curves. They will take their eyes off the road; and they will do other foolish things, forgetting that the impact of collision at 60 miles per hour is the same as driving a car off the roof of a fourteen storey building.
